

Horizontal Laminar Flow Workstation

The Microflow Horizontal Laminar Flow Workstation is designed specifically for product protection

The main HEPA filter is situated immediately behind the working area, clean air is then blown across the work surface towards the operator.

The units provide a clean environment ideal for the medical, pharmaceutical, electronics, food and industrial sectors for sterile manipulations, assembly of miniature mechanisms, production of optical preparations or any other application where clean conditions are required to protect the product from airborne contaminants.

The unit provides optimum product protection at all times and for special applications can be operated in reverse flow mode.

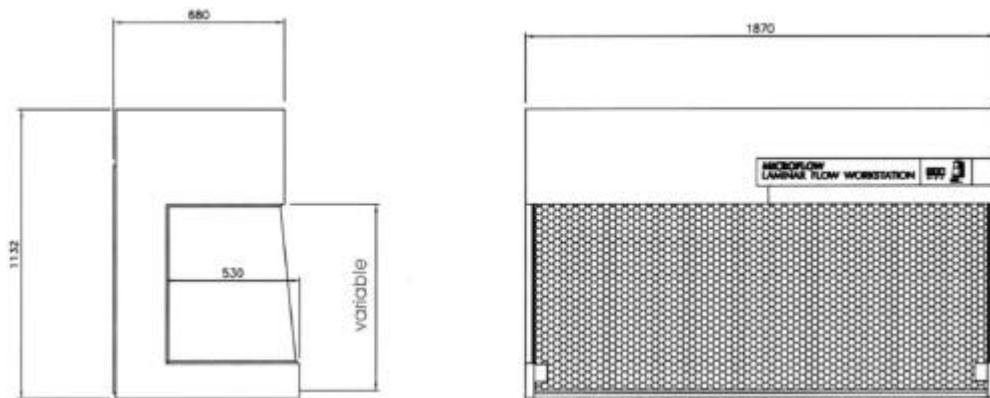

The working area has clear glass side screens for optimum visibility within the working environment. The stainless steel worksurface makes the unit easy to maintain and integral lighting is standard.

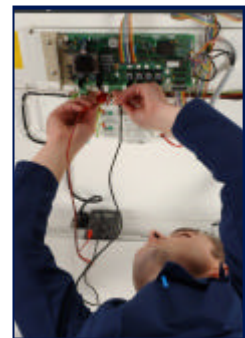

The fan unit runs at a low speed to prolong their life and maintain a low sound level. The ergonomic design ensures a practical and flexible working area making it suitable for many applications.

- Product protection
- Spacious, open working area
- Glass side screens for maximum visibility
- Compact, versatile workstation
- Tested to BS EN ISO 14664-1 Class 5

Cabinet Specification

1.8m workstation

Work area	316 stainless steel	Accessories	Electric Sockets - 2 singles max
Construction	Epoxy coated mild steel		Gas Tap
Noise Level	< 65 dBA		Vacuum Tap
Lighting	800 lux at work surface		Fixed High Level UV
Filters	99.999% HEPA - DOP tested - EN1822 H		Minihelic Gauge
Electrical supply	230v/50Hz single phase (other voltages available)		Night Door Assembly
			Stand (castors or feet)

	1.0m	1.2m	1.8m
External w x d x h (mm)	995 x 740 x 980	1260 x 740 x 1132	1870 x 740 x 1132
Internal w x d x h (mm)	885 x 530 x 580	1190 x 530 x 730	1800 x 530 x 730
Weight (kg) apprx	93	113	158
	N/A	or 1260 x 740 x 980	or 1870 X 740 X 980
		1190 x 530 x x580	1800 X 530 X 580
