

# Miniflow 8 Fume Cupboard

The Miniflow 8 is a bench mounted miniature fume cupboard providing operator protection when using hazardous chemicals

This unit has been specifically designed to provide a ventilated work area with unrestricted access for those operations that are difficult to perform within a fume cupboard.

Downflow action takes air away from the operator and a visual alarm will sound if airflow falls to an unacceptable level. The stainless steel tray is removable for easy cleaning and access to the pre-filter and has a perforated top to safely contain any spillages. Integral lighting fully illuminates the work area.

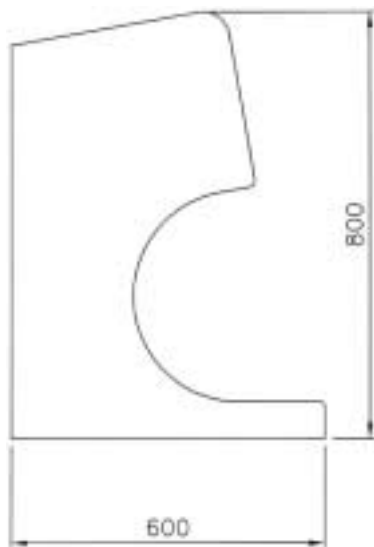

This compact unit can be moved to point of use and installed on an existing work surface without the need for ducting.

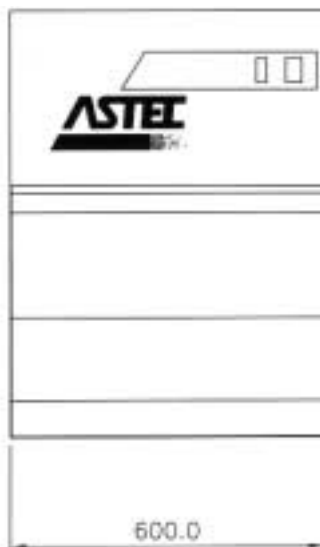

A filter clamping mechanism allows easy loading of the filter and ensures an even seal at the filter face at all times. A valuable safety feature is that the filter can be changed with no operator contact using a special bag supplied with the new filter.

- Operator protection
- Integral carbon filter
- Low airflow alarm
- Simple to maintain
- No ducting required

# Cabinet Specification

Miniflow 8

Construction	Epoxy coated mild steel frame	Accessories	Polypropylene Spillage Tray
Spillage Tray	Stainless Steel		Filter Saturation Alarm
Filters	Carbon - various		
Fan	Centrifugal		
Alarms	Low Airflow		
Controls	Mains On/Off		
Lighting	18w		
Electrical Supply	230v/50Hz single phase (other voltages on request)		

	Miniflow 8
External w x d x h (mm)	600 x 600 x 800
Work area w x d (mm)	530 x 430
Airflow (M <sup>3</sup> /Hr)	250
Face Velocity (m/s)	> 0.4
Noise Level (dBA)	52
Weight (kg)	50
Filter Weight (kg)	8
