MICROTEC HM-10 STEREOMICROSCOPE

HM-10 with binocular viewing head.

HM-10 with ergo viewing head enabling the angle to be adjusted from 0° to 30°.

The MICROTEC HM-10 stereomicroscope has a 10:1 zoom system. The head is a parallel optics type, enabling phototubes to be inserted between the binocular head and the zoom body. The zoom unit incorporates a double iris diaphragm, enabling the depth of focus to be adjusted both visually and when recording images. The zoom range is 0.8x to 8x, giving a total; magnification range of 4x to 360x

There are two types of phototube insert.

Code HM-PT1

Photo insert with light split 50%
visual / 50% photo

Code HM-10PT2

Photo insert with light split 100%
visual / 100% photo

The HM-10 stereomicroscope can be used with any of the stereomicroscope stands in the extensive MICROTEC range
